Mix-load stations:

- 1) Likely that frequent small spills and occasional large spills occur when sprayers are being filled
- 2) Mix-load stations are designed to decrease spills and recover spilled materials for use on grove

Permanent Mix-Load Station

Portable Mix-Load Station- With Slurry Tank

Portable Mix-Load Station- With Slurry Tank on Custom Trailer

Portable Mix-Load Station- No Slurry Tank

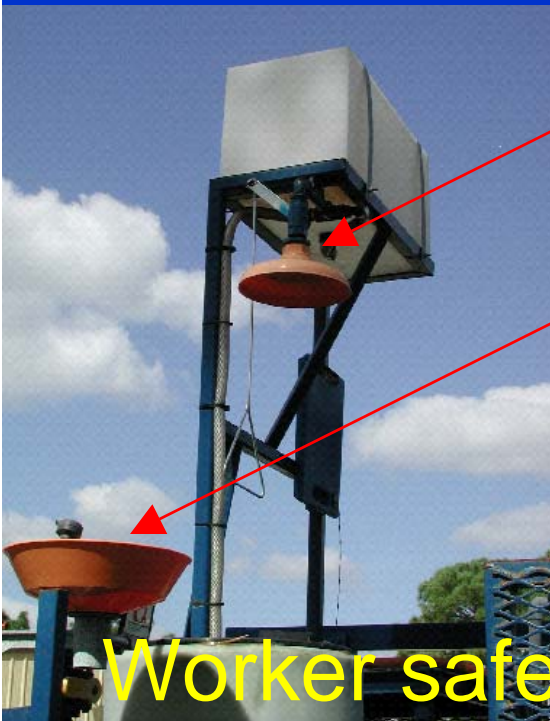

Mix-load trailer

Containment
gutter collects
spilled materials
to storage
where it can be
pumped into
sprayer for use

Chemicals are loaded onto trailer bed for easy access by worker. Materials are pumped into sprayer after adding to venturi. No need to haul chemicals up onto sprayer!

Shower and eye wash are additional safety features

Worker safety may be biggest selling point!
