Cost estimate worksheet for Variable Rate Technology (VRT) for Citrus BMP cost share Program

_____

Name of Applicant

The purpose of this worksheet is to give the Peace River Soil and Water Conservation District (PRSWCD) an estimate of the amount of money you are requesting, so that we can determine how many people we can award money. Keep in mind that we cannot award more than $10,200, no matter how much you spend. Your ranking is determined by the information requested on the application form and is not affected by your cost estimate. Please try to be as accurate as possible, and attach as much documentation as possible.

Provide a list of the equipment and associated costs of the equipment that you intend to purchase as part of this program. Attach additional sheets if necessary.

If you are applying for funding to retrofit an existing spreader, and you need equipment that is not directly related to VRT, include an explanation of why you need this equipment for the retrofit to be successful (i.e. how is the equipment related to using the spreader for variable rate capabilities). Items such as replacement tires are not eligible for cost share funding. Photographs would be helpful, though they are not necessary.

Quantity	Description	Unit Cost	Total Cost
